Multiplier Event: European system for VET in RESTORATIVE NEUROLOGY

Italy

**Description of the multiplier event (Please provide detailed information in particular on how the multiplier events supported sharing and dissemination of the produced intellectual outputs, the target audience and the outcome. In case there is a difference between what was planned and what was implemented, please explain why)**

The dissemination event will take place at ORAS in Italy in March 2023 and will aim at gathering a wide audience in order to widely disseminate the results of the project, as well as to act as a catalyst of a community of stakeholders sharing an interest and commitment to Restorative Neurology -based learning for the promotion of new skills and competences.

The aim of this event is to disseminate the final results of the activities of PROTOCOLS project, through a day of workshops and discussion. The event will give a detailed presentation of the activities undertaken during the project, focusing on their potential for expansion and adaptability to different context and countries. Materials produced for O1, O2, O3 and O4 will also be presented to all stakeholders and VET Providers during the day. The event will also comprise an open debate where discussants will give a feedback to project partners about the final results of the PROTOCOLS project.

The event will be international, meaning that it will involve stakeholders also from all over Europe, USA (at least 90). The direct targets of the event will be the project partners, other potential beneficiaries of the project and all relevant stakeholders able to take advantage from the disseminated activities, including students, teachers, schools, companies and organizations involved in Restorative Neurology-based learning and environmental VET training, public bodies, and interested citizens, as well as decision makers in VET and Healthcare digital system.
